did pandora get hacked!?

that page is all sorts of messed up

and that's where google too me for "pandora blues" link

every time I search for blues, it replaces it with "b" and tells me to listen to billy Eilish

I think pandora is broken

Mark Descalzo Tue 2:48 PM

this?

<https://www.pandora.com/genre/delta-blues>

REPLIES:

#winning

Justin Mayfield Tue 2:50 PM

perfect!

Mark Descalzo Tue 2:50 PM

just pasting the url failed...pandora recently had a facelift...!pleased

yeah...web client not please with pasting links alone. Chrome/Brave/Catalina bug?

Justin Mayfield Tue 3:06 PM

I had to retry everything like 3 times and eventually stuff sort of started to work.

but the whole site feels like a dumpster fire to me.

hate on google all you want, but google play music is dah bomb

I request early century blues music.

REPLIES:

Got a Pandora station for that?

Athen Pellicci Tue 6:13 PM

What was the poker night address again? I'm about to head over from class

Rose Wiegley Tue 9:31 PM

Ack! Sorry we just saw this!

Well we got home and homework was done, the youngest was all ready for bed and informed us that her sister is an awesome babysitter! Celebrating that we can go out after dark again!!

Raino Zoller Wed 10:13 AM

@athen sorry we missed you last night!

Athen Pellicci Wed 10:36 AM

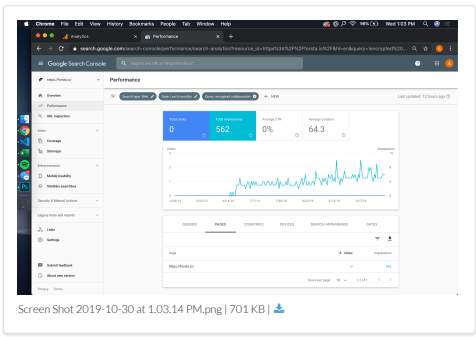

Next time! Enjoy your money while you still have it haha

REPLIES:

Raino Zoller

Note - it appears that Google is figuring out what we do. This is the trend for impressions for Forsta for "encrypted collaboration". Not big numbers yet, but we should be able to keep building this over time.

Screen Shot 2019-10-30 at 1:03:14 PM.png | 701 KB | [Download](#)

REPLIES:
 like it
 Nice!

1 Attachment

Justin Mayfield Thu 10:20 AM
That's pretty cool!

Rose Wiegley
Does anyone know where the bag of coffee on my desk came from?

REPLIES:
 That's classified. ;*)
 or who moved my chair to be in front of my desk?
 I'm blameless as not even in this week.
 Or maybe you just want us to think that...

Rose Wiegley Thu 12:47 PM
Well thank you mystery giver of coffee! I love the bag!

image.png | 14 MB | [Download](#)

1 Attachment

Justin Mayfield
Maybe Pat's wife or daughter?

REPLIES:
 Getting warmer.

Tammy

REPLIES:
 Nah, but that would be a really cute connection!
 I second this guess?
 Really, a great guess with the running connection, but nope.

Rose Wiegley Thu 10:14 PM
Would anyone like candy?

Greg Perkins Thu 10:16 PM
Is that rhetorical?

Rose Wiegley Thu 10:17 PM
I can bring the extras to work tomorrow if anyone wants it.

Greg Perkins Thu 10:20 PM

Awesome! (Beggars can't be choosers, but I was hoping it wouldn't be candy-korn;^)

Athen Pellicci Fri 9:30 AM
I left some cookies in the breakroom. Help yourselves!

Justin Mayfield Fri 10:09 AM
Thanks Athen

Mark Descalzo
Lena doing what Lena does. (Jerry Miculek's daughter)
<https://www.instagram.com/p/B4QLq28IYEs/?igshid=1n94iq5n2xi4d>
REPLIES:
Ops. Meant that for Random

Mark Descalzo Fri 12:37 PM
Is the meeting on?

Rose Wiegley Fri 12:39 PM
Who's in the office now? I was going to come in since I hadn't heard for sure from Pat if he was canceling it.

Athen Pellicci Fri 12:39 PM
I'm in

Mark Descalzo Fri 12:45 PM
I'll head to the home office. Conference me if there's a meeting.

Pat Sewall Fri 1:02 PM
Be there in 10

Forsta Fri 1:25 PM
You missed a call from Rose Wiegley.
Only visible to you

Rose Wiegley Mon 8:31 AM
There's candy in the break room. Please, please help yourself! Take it to your friends... save me from it. (Just please leave the container it's in.)

Rose Wiegley
Also, fyi, the tea migrated to the bottom left hand drawer in the break room.
REPLIES:
yeah, I moved it this morning so it was easier to get the creamer... sorry
I did also get more coffee however...
RW Not a problem! I was just making sure other tea drinkers knew where it was. However I think there is a total of 2 of us...

Rose Wiegley
Another FYI: Team meetings have been moved to Monday's at 2PM, with an engineering meeting right after at ~3PMish. However, we're skipping it this week since we just had the meetings on Friday.
REPLIES:
+1

RZ **Raino Zoller**
Hello all, Just curious if anybody @Forsta has been creating a bunch of test orgs. Format along the lines of "test.org.2226" If not somebody else is creating a bunch of these orgs "
REPLIES:
Yeah, that might have been me... Nevermind those!

Justin Mayfield 16 hours ago
not me

Rose Wiegley 16 hours ago
Not me... and where are you getting those from?
I looked at our org list and assuming the admin search function is working I don't see anything with that format
However, based on at least one colorful org name I see either captcha is not setup for org creation... or it's not working perfectly

Justin Mayfield
@ALL Vote today.
REPLIES:
RW 🙌

Mark Eberly 4 hours ago
for who?

Justin Mayfield 4 hours ago
mickey mouse

<https://www.ktvb.com/voterguide>

Mark Eberly 4 hours ago
just messing with ya

Justin Mayfield 4 hours ago
(I know)

Mark Eberly 4 hours ago
however...sometimes I think voting for Mickey Mouse would in fact be the best option.

Justin Mayfield 4 hours ago
I often have TBH
I'll write you in for something today Mark.
REPLIES:
sweet!

FYI: @ALL dev cluster is going through kube update

and if anyone has access to our email system I need some help.

REPLIES:
What do you need?

Mark Descalzo 4 hours ago
None of the above ought to be a counted option.

Justin Mayfield 4 hours ago
emails to admin@forsta.io
link from aws

I would like to just be on that email as a fwd'r if possible. this comes up everytime

Rose Wiegley 4 hours ago
It's currently an alias for @pat.sewall - let me see if I can change it to a distribution list

Justin Mayfield 4 hours ago
thanks rose.

Pat fwd'd me the emails I needed. So we should be good for now, but it comes up every once in a while

I'm pretty sure it only ever gets used for domain auth.

Rose Wiegley 4 hours ago
Note admin@forsta.io is going to go down for a short bit as I kick pat off it and set up a group

@mayfield@pat.sewall@greg - Please confirm you got my test email to admin@forsta.io . I sent it from a personal account to confirm I set the permissions correct.

REPLIES:
works

Justin Mayfield 4 hours ago
looks good

Rose Wiegley
On a funny note our system says "You" on the left when it's something you have typed... but when Mark Eberly types something it says "ME" ... which totally throws my brain off...
REPLIES:
ME...full initials are MEE

Mark Descalzo
@pat.sewall Apple needs your attention:

The updated Apple Developer Program License Agreement needs to be reviewed.

In order to update your existing apps and submit new apps to the App Store, the user with the Legal role (Team Agent) must review and accept the updated agreement in their [account on the developer website](#).

image.png | 69 KB | [Download](#)

REPLIES:
This is blocking me
I told Apple's site to send him an email.

1 Attachment

Justin Mayfield

Paused - click to restart

REPLIES:

- that is hilarious!!!
- That hurts to watch!!
- this is what my cats do if i leave the bathroom door open
- It is about as bad as nails on chalkboard for me..
- Clearly needs more fiber in their diet.
- I'm in pain! My previous cats would do that... so far my current ones prefer eating any strings they can find... which is worse!
- I want to leave snippets of yarn in all the colors of the rainbow around your house now....
- I guarantee you don't... yarn = dead cat ... best case is about \$1000+ vet bill...
- And my kids already do a very good job at that... I'm basically the yarn police...
- Oh, I was thinking technicolor poops like we deal with because retrievers.
- Nope... I wish that was it!

Justin Mayfield

I notice you guys like to use reply

REPLIES:

- (1) yes

why?

REPLIES:

- It signifies to what/whom i'm replying to
- and because reasons

Mark Descalzo 23 minutes ago

Paused - click to restart

@mayfield I sincerely thank you for the minimize control on messages

Justin Mayfield 22 minutes ago

there is also delete if you really want to hide it

I wonder if the current version of reply is misdirected.

I didn't ever expect it would get used to the extent that you guys use it.

As it stands now I have to do a full page scan when I get new messages to figure out where the new content is.

REPLIES:

- This. It's a double-edged sword.

cause it's not on the bottom usually

Greg Perkins 20 minutes ago

I like it, but the repeat/voteup thing isn't as useful for me.

Justin Mayfield 20 minutes ago

I find that frustrating most of the time.

Would be better as just a quote?

> Would be better as just a quote?
my reply here

Greg Perkins

I find that frustrating too -- maybe a quick toggle on the view to highlight/present the new stuff currently "above the fold" or something?

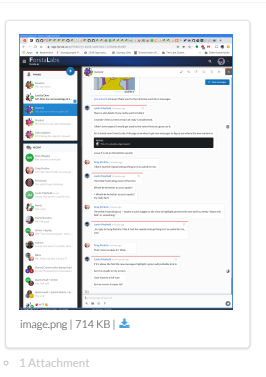

REPLIES:

this?

Justin Mayfield 19 minutes ago
_In reply to Greg Perkins: I like it, but the repeat/voteup thing isn't as useful for me... cool

Greg Perkins 19 minutes ago
That's how ios does it, I think.

Justin Mayfield 18 minutes ago
if it's above the fold the new messages highlight system will probably kick in,
but it is usually on my screen
I just have do a full scan
but my screen is super tall

Mark Descalzo
[@pat.sewall](#) But wait, there's more!

Review the updated Paid Applications Schedule.

In order to update your existing apps, create new in-app purchases, and submit new apps to the App Store, the user with the Legal role (Account Holder) must review and accept the Paid Applications Schedule (Schedule 2 to the Apple Developer Program License Agreement) in the Agreements, Tax, and Banking module.

To accept this agreement, they must have already accepted the latest version of the Apple Developer Program License Agreement in their [account on the developer website](#).

image.png | 107 KB | [Download](#)

REPLIES:

This one is on App Store Connect under Agreements, Tax, and Banking

1 Attachment

Greg Perkins 17 minutes ago
I do know to go looking for the line for new stuff, but it might be cool for it to have two lines: the new standalone messages line, and the no-new-replies beyond here...

Justin Mayfield 13 minutes ago
that is a lot of information to try and explain.

Reply to this message Send Reply

Greg Perkins 13 minutes ago
yeah

Justin Mayfield 13 minutes ago
You know me. I'm looking for ways to remove stuff all the time.

Greg Perkins
Just before asking for a new thing, I did suggest an old thing to remove. :^)

REPLIES:

It'd be fine if there were just some sort of indication that it's a new thing I haven't seen -- whatever form it takes.

Justin Mayfield
I didn't see anything about removing stuff.

REPLIES:

(5)  The upvote/repeat thing?

 **Mark Descalzo** 9 minutes ago
I will not argue against removing replies.

 **Justin Mayfield** 8 minutes ago
oh upvote repeat.

 **Mark Descalzo** 8 minutes ago
@pat.sewall THANK YOU! I'm in finally!

 **Justin Mayfield** 8 minutes ago
yeah maybe that too. I mostly have trouble with textual replies.
I don't care if I miss a +1

 **Greg Perkins** 8 minutes ago
Yeah, and if it's there I want to know who sent them, which I can't tell right now..

 **Mark Descalzo** 7 minutes ago
honestly, I think @mentions can fulfill most of what replies do

 **Justin Mayfield** 7 minutes ago
that's true

 **Greg Perkins** 7 minutes ago
unless you're talking with @mayfield -- in which case there could be 50 things to refer to, and only one @mayfield...

/reply @mark.descalzo here's an idea

or make reply act like a mention

 **Mark Descalzo** 6 minutes ago
that

 **Greg Perkins** 6 minutes ago
Or just do it the iOS way and quote the thing on a new message..

 **Justin Mayfield** 6 minutes ago
so you hit reply and it adds the mention for the user and adds a quoted snip of what you're talking about

 **Mark Descalzo** 6 minutes ago
the iOS (Signal) way is FUGLY

 **Justin Mayfield** 6 minutes ago
with ellipsis overflow that can be expanded and clicked on to go to the original
re: signal, yeah I agree

 **Greg Perkins** 5 minutes ago
yeah. I'd love to have a toggle for "show it to me serially" vs "show it to me all tree-style"

 **Mark Descalzo** 5 minutes ago
@mayfield My brain was headed the same way on that

 **Justin Mayfield** 5 minutes ago
hopefully we could come to a happy medium

 **Greg Perkins** 5 minutes ago
But I'm not a normal user.
Then I'd toggle to serial to see what's new, and tree-style for thinking about the thread.

 **Justin Mayfield** 5 minutes ago
@greg the ios way sounds the same as signal

 **Greg Perkins** 5 minutes ago
yep

 **Justin Mayfield** 5 minutes ago
I don't use apple software, so I can't comment on it.

 **Greg Perkins** 4 minutes ago
not space-efficient, and doesn't hold the relationships in as useful a way.

 **Mark Descalzo** 4 minutes ago
There is no iOS way for replies...only Signal (and Zule)

 **Greg Perkins**
I want replies to replies, too.:^)
